Beautify Your Garden with the World's Finest Roses

FALL 1958 • SPRING 1959

Our rose bushes are all good, healthy, field grown. Each bush is labeled true to name. If any prove otherwise, we will gladly replace them.

All but a few varieties of our rose bushes are budded on Odorata root stock. From tests conducted in many sections of the country, this root stock has proven the best, as hybrid-tea varieties budded on it outgrow and live longer than any other root stocks. We grow all the rose bushes offered for sale in this catalog at our nursery at Stockton. We also exercise the greatest of care in digging, packing, and shipping so that they get to you in the best condition possible.

We will replace any bushes that you receive from us that were damaged in shipping if notified within ten days, but do not replace good bushes that are planted and do not grow as there are too many soil and climatic conditions involved over which we have no control.

The first Spring after planting rose bushes, remove only old flowers, leaving all stems and leaves possible.

All our rose bushes, if given proper care, will bloom for you the first Spring and will continue all Summer and Fall. Climbing roses bloom very little the first year, but will be covered with bloom the second Spring.

When Ordering by Mail Read Carefully

Please mention if you wish substitutions if we are out of some varieties in your order. If so, state preferences.

Please include cash, check or money order. No C.O.D. orders accepted. We ship no orders amounting to less than \$3.00.

Our shipping season begins December 1st and ends February 15th. We can supply rose bushes in gallon cans at our nursery sales yard during the summer, but we do not ship these.

Open daily including Sunday but closed on New Years Day, Easter Sunday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day and Christmas Day.
